EDUCATION

Rochester Institute of Technology, Golisano College of Computing and Information Sciences

Rochester, NY

Bachelor of Science, Game Design and Development

May 2026

Minor in Communications

Relevant coursework: Web Development, Data Structures and Algorithms, UI/UX design course

EXPERIENCE

Front-end Developer

June – August 2024

MAGIC Spell Studios

- Designed 20+ high-fidelity Figma wireframes and implemented them with responsiveness
- Improved navigation clarity by 30% through 3 rounds of usability testing and iteration
- Built a React component library from legacy HTML/CSS, standardizing design tokens and reducing dev handoff time by 20%

Product Designer Intern

June – August 2026

RIT Saunders College of Business — Kozel Team

- Designed 30+ logo concepts and developed 20+ wireframes and UI mockups to establish the visual identity and user
- Collaborated with a team of four designers and developers to design and develop a functional application prototype
- Conducted 200+ user interviews to uncover pain points and validate social sports connections, directly shaping the product roadmap

SKILLS

Languages and Frameworks | JavaScript, React, HTML, CSS, C#, C++, Python, SQL, Node.js

Game and UI Technologies | Unity, Godot, MonoGame, Unreal Engine, Figma, Axure RP

Tools and Platforms | Jira, Git/Github, Visual Studio, VS Code, Maya, Adobe Creative Suite, Microsoft 365 Suite

PROJECTS

[Quoth of Raven](#) | *Front-end Programmer and UI/UX Designer, Team Project*

Tools: Git/Github, Godot, C#, Figma, Adobe Photoshop

- Collaborated on a team of 5 developers to build a game in Godot Engine, delivering 100% of project milestones on schedules
- Boosted workflow efficiency by 40% by managing sprint planning and task tracking in Jira, improving team communication
- Designed and implemented game state systems (pause and main menus) to create a seamless and intuitive user experience
- Architected dynamic item interaction systems and programmed core player-enemy mechanics, increasing gameplay engagement

[Pokemon Search Project](#) | *Full Stack Web Developer, Project*

Tools: Git/Github, Visual Studio Code, JavaScript, HTML, CSS

- Built a full-stack Pokémon management app with CRUD API functionality, improving data organization and usability
- Structured application using MVC architecture to enhance scalability and maintainability
- Developed a responsive front-end interface with a modern CSS framework
